

## Job Description – Research Scientist – Cell Biologist

Ensemble Therapeutics Corporation is seeking a full-time Associate Scientist level candidate to support our in vitro cell based assay development team. In this position you will work with our drug discovery scientists to support the development of novel therapeutic compounds. The ideal candidate will feel at home in a fast-paced and multi-disciplinary biotech environment, working independently within a results-focused group.

### Responsibilities:

The candidate should be well versed in a variety of cell based methods and have previous experience developing, optimizing and conducting cell based assays. Strong candidates will demonstrate proficiency with experimental design, assay development, and statistical/computational analysis of data. Also desired is familiarity with basic molecular biology techniques such as vector creation and cell transfection. We value strong written and verbal communication skills, the ability to work within a fast-moving team, enthusiasm for science, and a flexible, entrepreneurial spirit.

### Qualifications:

- B.S. plus 2-3 years of industrial experience in a drug discovery environment or M.S. in Cell Biology, Molecular Biology or a related discipline.
- Sound understanding of tissue culture, cell biology, immunoassays, and general laboratory techniques.
- Effective and creative problem-solving skills.
- Ability to execute, analyze, and troubleshoot experiments.
- Excellent oral and written communication skills as well as strong organizational and critical thinking skills.

Please submit your resume directly to [hr@ensembletx.com](mailto:hr@ensembletx.com).

Be sure to include the title of the job that you are applying for in the subject line of your email.
